

K-LOVE radio is programmed into all of our vehicle radios. It provides music the whole family can listen to. I don't have to worry about profanity or other things not suitable for my children mixed in with the music, and I don't have to listen to commercials!

K-LOVE is the only alternative to the main stream secular stuff that is out there. Without it, there would not be any stations that I would feel good about having on in the car while driving my kids to school and other activities.

K-LOVE provides a positive influence for the young people of this country. All the negative media out there bombarding our youth is building a generation without hope for a positive future. We need these stations to continue so there will be balance. Don't let our communities be overrun by the aggressively negative secular music culture.

We NEED K-LOVE!
